SUMMARY

I am a Software Engineer with 2 years of experience in web development, specializing in React.js, TypeScript, and Laravel. I have hands-on experience delivering end-to-end software solutions, including implementation, testing, deployment, and troubleshooting. I am proficient in using Docker for deployment and environment management, and I am accustomed to working in collaborative, cross-functional teams. Through projects such as the Kampus Merdeka x Alterra Academy capstone project, I bring strong problem-solving skills, effective communication, and a commitment to delivering reliable, scalable, and high-quality applications.

WORK EXPERIENCES

PT Vesperia Global Merdeka – Junior Software Engineer *Feb 2024 – Present*

- Developed and maintained scalable, responsive user interfaces using React.js and TypeScript to improve usability and user engagement.
- Built and contributed to backend services using Golang and Laravel, supporting core business logic and API development.
- Integrated frontend features with RESTful APIs, ensuring reliable and consistent data exchange between frontend and backend.
- Collaborated closely with UI/UX designers, backend engineers, and product stakeholders to streamline navigation and optimize user flow.
- Optimized, refactored, and debugged code across frontend and backend to improve performance, maintainability, and system stability.

Informatics Laboratory, Gunadarma University – Assistant *Sept 2021 – Aug 2025*

- Assisted lecturers in practicum class management for 100+ students per semester.
- Taught Database Systems (MySQL & PostgreSQL) and Algorithm Design & Analysis, demonstrating ERD and DFD modeling using StarUML.
- Maintained and troubleshooted laboratory computers, ensuring minimal downtime during practicum sessions.

PROJECT EXPERIENCES

PT Bursa Efek Indonesia

- Developed and optimized report and management forms using React.js and TypeScript, ensuring high performance and responsiveness.
- Handled and adjusted backend flow and logic using Golang, including minor fixes to existing services to support data accuracy and form functionality.
- Implemented cross-browser and cross-device testing to maintain functionality and compatibility.
- Collaborated with the design team using Figma to translate UI/UX into functional components.

Tech Stack: React.js, TypeScript, Golang, Node.js, Laravel, Figma, Visual Studio Code.

PT Mandiri Utama Finance (ORM-System)

- Built and optimized a web-based issue management system using Laravel for backend and React.js for frontend, ensuring efficient database management and seamless performance.
- Conducted comprehensive testing across multiple browsers and devices to maintain functionality, responsiveness, and compatibility.
- Collaborated with the design team using Figma to translate UI/UX into functional and scalable components.

Tech Stack: PHP, JavaScript, Laravel, React, PostgreSQL, Postman, Docker, Node.js.

PT Sarana Multi Infrastruktur (DRD)

- Maintained and enhanced the corporate web platform by implementing new features and fixing bugs using PHPSpreadsheet with PHP 7.4.
- Developed and integrated custom client credential authentication middleware to secure API access and ensure reliable communication between services.

Tech Stack: PHP, Laravel, Postman, PostgreSQL, Docker.

Nuxa Skin Clinic

- Maintained and improved the Nuxaskin website by implementing new features and ensuring smooth integration between backend and frontend.

- Converted design mockups into a responsive frontend using React, ensuring cross-device compatibility and enhanced user experience.
- Collaborated with designers using Figma to translate UI/UX into scalable, production-ready components.

Tech Stack: React.js, Laravel, Figma, GitHub, Visual Studio Code.

Alterra Academy, Campus Merdeka Program

- Developed a Learning Management System (LMS) application as part of the Campus Merdeka program, covering UI/UX design, frontend, backend, and mobile development.
- Designed and implemented application home pages and course display features for mobile platforms, ensuring usability and responsiveness.
- Collaborated with team members to integrate UI/UX concepts into a functional application using Flutter.

Tech Stack: Dart, Flutter, Visual Studio Code, GitHub, Emulator.

Lembaga Komputerisasi Gunadarma – Database Project (Oracle)

- Worked on an Oracle database project focused on database configuration, PL/SQL object management, and performance optimization.
- Learned and applied best practices in managing database storage structures, monitoring processes, and handling data recovery.
- Implemented database backup and restore procedures using Oracle tools.

Tech Stack: Oracle Enterprise Manager.

D'Laundry Group

- Built a mobile application to manage customer transaction data and employee performance, tailored for small business operations.
- Designed and implemented UI layouts from Figma into Flutter, integrated Firebase for transaction data storage, and conducted testing across multiple Android devices.
- Ensured smooth functionality and user-friendly experience for both customers and staff.

Tech Stack: Dart, Flutter, Firebase, Figma, Visual Studio Code.

EDUCATION

Gunadarma University *Sept 2019 – Aug 2023*
Bachelor of Computer Science, majoring in Informatics — GPA: 3.80

SKILLS

Technical Skills

- UI/UX Design: Canva, Figma, Draw.io
- Database: MySQL, PostgreSQL
- Tools: Docker, Visual Studio Code, GitHub, Trello, Discord
- Productivity: Microsoft Office

Soft Skills

- Communication
- Adaptability
- Fast Learning

CERTIFICATIONS

Mastering Flutter From Zero to Hero Engineer – Alterra Academy *Aug 2022 – Dec 2022*

- Covered Dart fundamentals, OOP, Firebase integration, and collaborative capstone project (LMS App).

Building Website using HTML 5 Training – Lembaga Komputerisasi Gunadarma *Dec 2021*

- Built registration forms and basic web components using HTML5.

Oracle and SQL Course – Lembaga Komputerisasi Gunadarma *Sept 2019 – Mar 2023*

- Database design, backup, and recovery practices.

LANGUAGES

- Indonesian – Native
- English – Intermediate
